CALIFORNIA WITHHOLDING SCHEDULES FOR 1999

California provides two methods for determining the amount of wages and salaries to be withheld for state personal income tax:

- METHOD A (Wage Bracket Table Method) provides a quick & easy way to select the appropriate withholding amount, based on the payroll period, filing status, and number of withholding allowances (regular and additional) if claimed. The STANDARD DEDUCTION and PERSONAL EXEMPTION CREDIT allowances are ALREADY included in the wage bracket tables. Even though this method involves fewer computations than Method B, it cannot be used with your computer in determining amounts to be withheld.
- <u>METHOD B (Exact Calculation Method)</u> may be used to calculate withholding amounts either manually or by computer. This method will give an exact amount of tax to withhold. To use this method, you must enter the payroll period, filing status, number of withholding allowances, standard deduction, and personal exemption credit amounts. These amounts are included in TABLES 1 through 5 of the EXACT CALCULATION Section.

If there are any guestions concerning the operation/methodology of Method B for computer software, you may contact:

Franchise Tax Board, Statistical Research Section - 616 Mail Stop B-26, P.O. Box 942840, Sacramento, CA 94240.

SPECIAL NOTE FOR MARRIED EMPLOYEES WITH EMPLOYED SPOUSES: to avoid underwithholding of state income tax liability we recommend that one of the following options be used: Single filing status be used to compute withholding amounts for the greater salaried spouse; OR additional flat amounts of tax be withheld.

Instructions for additional withholding allowances for estimated deductions:

All additional allowances for ESTIMATED DEDUCTIONS that are claimed on "California Form DE-4" must be used to reduce the amount of salaries & wages subject to withholding by using steps 1 and 2 shown below. If the "Federal Form W-4" is used for California withholding purposes, all additional allowances for ESTIMATED DEDUCTIONS claimed must be treated as regular withholding allowances; UNLESS the employee requests in writing that they be treated in accordance with the following:

- 1. Subtract the employee's estimated deduction allowance shown in the "TABLE 2 ESTIMATED DEDUCTION TABLE" from the gross salaries and wages subject to withholding; and
- 2. Compute the tax to be withheld using:

METHOD A - WAGE BRACKET TABLE METHOD; or METHOD B - EXACT CALCULATION METHOD

If "California Form DE-4" is used for California withholding purposes, the tax to be deducted and withheld must be computed on the basis of the total number of regular withholding allowances claimed on line 1 of Form DE-4.

If the 'Federal Form W-4' is used for California withholding purposes, the tax to be deducted and withheld must be computed on the basis of the total number of withholding allowances claimed on line 1 of Form W-4; minus the number of additional allowances for estimated deductions claimed. If Form W-4 does not separately identify the number of additional allowances for estimated deductions, the employee's request must specify the number claimed. The employee's request will remain in effect until the employee terminates it by furnishing a signed written notice or by furnishing a "California Form DE-4".

Employers may require employees to file "California Form DE-4" when they wish to use additional allowances for estimated deductions to reduce the amount of salaries and wages subject to withholding.

CALIFORNIA WITHHOLDING SCHEDULES FOR 1999

METHOD B - EXACT CALCULATION METHOD

This method is based upon applying a given percentage to the wages (after deductions) which fall within a taxable income class, adding to this product the accumulated tax for all lower tax brackets; and then subtracting a tax credit based upon the number of allowances claimed on the employee's withholding allowance certificate (California Form DE-4 or Federal Form W-4). This method also takes into consideration the special treatment of additional allowances for estimated deductions.

The steps in computing the amount of tax to be withheld are as follows:

- Step 1 Determine if the employee's gross salaries and wages are LESS than, or equal to, the amount shown in "TABLE 1 - LOW INCOME EXEMPTION TABLE." If so, no income tax is required to be withheld.
- Step 2 If the employee claims any additional withholding allowances for estimated deductions from DE-4, subtract the amount shown in "TABLE 2 ESTIMATED DEDUCTION TABLE" from the gross salaries and wages.
- Step 3 Subtract the standard deduction amount shown in "TABLE 3 STANDARD DEDUCTION TABLE" to arrive at the employee's taxable income.
- Step 4 Use "TABLE 5 TAX RATE TABLE" for the payroll period and marital status to find the applicable line on which the taxable income is located. Perform the indicated calculations to arrive at the computed tax liability.
- Step 5 Subtract the tax credit shown in "TABLE 4 EXEMPTION TABLE"* from the computed tax liability to arrive at the amount of tax to be withheld.
- * If the employee uses additional allowances claimed for estimated deductions, such allowances MUST NOT be used in the determination of tax credits to be subtracted.

EXAMPLE A:	Weekly earnings of \$150	single and claiming one	withholding allowance	on Form DF-4 or W-4
	VVCCRIV Carrillings of wroo	, single, and claiming one	, with infolding anowariot	, OII I OIIII DE -

- Step 1 Earnings for the weekly payroll period are LESS than the amount shown in "TABLE 1 LOW INCOME EXEMPTION TABLE" (\$158.00); therefore, no income tax is to be withheld.
- EXAMPLE B: Biweekly earnings of \$950, married, and claiming three withholding allowances, one of which is for estimated deductions:
- Step 1 Earnings for the biweekly payroll period are GREATER than the amount shown in "TABLE 1 LOW INCOME EXEMPTION TABLE" (\$630.00); therefore, income tax should be withheld.

Step 2	Earnings for biweekly payroll period	\$950.00
	Subtract amount from "TABLE 2 - ESTIMATED DEDUCTION TABLE"	-38.00
	Salaries and wages subject to withholding	\$912.00

- Step 4
 Tax computation from "TABLE 5 TAX RATE TABLE":

 Entry covering \$709.00 (over \$396.00 but not over \$936.00)

 2% of amount over \$396.00 (.02 x (\$709 396))
 \$ 6.26
 - Plus the marginal amount +3.96Computed tax 10.22

NOTE: Table 5 provides a method comparable to the federal alternative method for percentage calculation of withholding. This method is a minor simplification of the exact calculation method described above in that the tax rate applies to the total taxable income with the excess amount subtracted.

For example, the amount of tax credit for a married taxpayer with 15 allowances, as determined on form DE-4 or W-4, on a weekly payroll period would be \$20.25.
